

[\(00:03\):](#)

[inaudible]

[\(00:05\):](#)

I lost my place. That's just awesome. Nathan, myself right out of the scriptures. Oh yeah. Yeah. Then the Lord saw that the wickedness of man was great in the earth and that every intent of the thoughts of his heart was only evil continually and watched us end. The Lord was sorry that he made man on the earth. That's a potent statement to hear from God. Okay. And he said, I will destroy man, from whom I have created from the face of the earth, both man and beast creeping thing, and birds from the air for, I am sorry that I made them. Now. I want to say something here that might really stretch you, but I'm probably going to stretch you a lot today. And I apologize somewhat, but also I don't, if it's just men that's been corrupted. Why is he destroying the animals to

[\(01:03\):](#)

Just food for thought in times when Joshua came into the promised land and even with soul, you'll see king Saul in his time, when they would take cities, God would say destroy all men and animals do not take anything. Do not why. And I'm going to get to that in a little bit. Okay. Because the corruption was on a cellular level, on a genetic level, across all living things. Okay? Okay. Watch this creeping these birds for I'm sorry that I made them watch this. And this is where it passed. The judge started reading, but Noah found grace in the eyes of the Lord. This is the genie ology of Noah. Hello? Noah was just man perfect in his generations. Now this is the interesting point. I want to stop you right here for a second. When this scripture, when this book was actually translated, it was translated a few hundred years ago. King James, right? The problem is, is that they didn't have microscopes studying cells and things like that. They didn't have modern science and some of the language just didn't make any sense. But this scripture, it says that Noah was perfect in his generations is not the correct word from the original. Do you know what the correct word from the originalists now was perfect. Genetically

[\(02:32\):](#)

Y and when you start to think about it, it's just told us before that angels are coming and they're breeding with human women and creating giants. And so the blood line is corrupt. And so the next thing it's telling us is Noah is perfect. Genetically, you tracking me here. Kind of makes sense. Doesn't it? When you stop and think about it, okay. Keep with me here. No, it was perfect in his generations, genetics, genetics, or generations. Even if you want to go back to the word generations, if you want to, you know, if you're choking a little bit on me saying the word genetics, go and study it for yourself in the ancient Hebrew and Greek, you'll start to realize that what I'm saying is not wrong, but even if you want to dispute the word genetics, then why is it saying that he is perfect in his generations? That means that there has been no pollution in the bloodline. That's what perfect in your generations means. There's been no pollution in his bloodline. So he's human.

[\(03:42\):](#)

He's not human. 2.0, you catching me here. If you're triggered, we'll pray for you. Perfect. And as generations watch this, Noah walked with God and Noah got three sons, Shem, ham, and JFF. The earth was also corrupt before God. And the earth was filled with violence. Now does this sound like 20, 21? The earth was corrupt before God. And it was filled with violence. It just, yeah, kind of makes a whole bunch of scenes. Doesn't it. Okay for listen to this for all. Flesh had corrupted their way on earth. So what you're saying was is their genes were corrupted.

[\(04:34\):](#)

Hello? There genes were corrupted. All fleshed. When it's using flesh. Remember that's old English language, all flesh was corrupted. Okay. Let's keep tracking here. Now come with me to Genesis chapter seven. The flood is happening now as being obedient, he built an Ark, took him 120 years to build an Ark. Hey, that's serious lifeboat material. That's a whole lot of obedience when you've never seen. And by the way, the reason that people live for eight, 900,000 years, you guys know why is because prior to the flood, there was no oceans. If you read, I don't have time to get into it right now, but real quickly, this is the fast that you can go back and read it. It's right there. It says that there was a firmament. Now I've been around some of these people that try and tell you that the flat earth is a thing there's literal scriptures in the Bible.

[\(05:34\):](#)

It tells you that the earth is a ball of sphere hanging in space, suspended in space by God. But some of these people want to tell you what's the first be gone old, Genesis six on us. But this is one. This is what really the Bible tells us. Okay? The Bible tells us that there was a firmament of water, which means almost like a membrane of water around the earth, a literal, like a, like a skin membrane, thick water, all around the earth, which caused all the fruit, the trees and the animals to flourish and grow huge probably was allowing people to live at a taller stature, right? It blocked all of the UV rays from the sun, right? And it never rained. Bible tells us in Genesis, you can read it for yourself. It says that every morning there was a Jew on the ground. It's called condensation.

[\(06:34\):](#)

So God's telling Noah that there's going to be a flood in a place that had never seen rain. And didn't have oceans. He's building a boat for something that had never, ever been seen before. Not just the boat. This thing was like the size of the Titanic. It was massive. So you catching me here. So, so God literally w he w when it says that it flooded and all the mountains were covered, the filament collapsed on the earth. That water membrane collapsed. You guys catch that. So everything died. Is this new for some of you guys, some of you guys, like I thought I came to a Christian term, what's this like some kind of transcendental meditation.

[\(07:20\):](#)

This is right here. Someone getting something. I hope so. I hope we see you next week, but I just gotta, I gotta do this. Cause I really feel strongly that we need to get the truth out and I'm not ashamed. Okay. Okay. So Genesis chapter seven now, verse 21. And I'm gonna read through 24 and all flesh died. That's the flood. That's the firmament collapsing. So when it flooded, when the flood happened, guys, it was diabolical. It was diabolical. It wasn't just like a little bit scary. It was catastrophic. So we're not talking like one of these floods where there's like, you know, a hurricane and there's 3, 4, 5, 12 feet of water comes through Houston. We're talking entire mountains. It talks about error, rent getting covered. So that's several thousand feet of water. That's why you're finding Miglin on teeth in north America. You want to know why at any evolution is more water.

[\(08:25\):](#)

And that's why there's oceans under the earth, because it all sits. You can see it. It's subsided into the earth. It's right there in the scriptures. We'll let water subsided inside. Kevin's in the earth. Do your research. It's right there. Okay. So watch this end. All flesh died. Verse 21 that moved on the earth, birds, cattle, beast, and every creeping thing that creeps on the earth. And every man, all in those, sorry,

watch this all in whose nostrils was the breath of the spirit of life. And that was on the dry and all it was on the dry land died. He also destroyed all living things, which were on the face of the ground. Both man and cattle preping thing, bird of the year, they were destroyed from the earth only Noah. And those who were with him in the ark remained alive. And the waters prevailed on the earth and 150 days. Okay, stop right there. If to understand that when those angels came and when I say angels, we're talking about demonic entities. Okay.

[\(09:31\)](#):

When they came and they started procreating, that's a fallen angel. Okay. It is literally a curse being. That's now trying to obtain the breadth of the spirit of life in a human cause. They've lost if you understand this. So they curse, they fallen and they're trying to get the life force of God's spirit out of a human and create a hybrid. Because here's the thing when the fall happened, the fall was there to judge humanity, right? So a hybrid doesn't apply to the judgment of man. Are you catching this? I want you to like really think here. Okay.

[\(10:21\)](#):

So everything, everything gets destroyed. So did you notice here that the Bible tells us that everything's destroyed? So every single giant, all the animals, all your little dinos. Okay. The saber tooth tiger. A little whoop. Woolly. Mammoth is all blown out. It's gone. Okay. Right. Make Ladon. He's gone. Benjamin's very upset about that. He loves dinosaurs. My oldest boy, I mean, he loves Megalodon sharks. I personally don't. They wouldn't be a good thing to, you know, go encounter. So now I'm going to show you something. That's actually, that's something I'm going to show you something that's actually really disturbing when you start to see what happened was, so Noah had three sons, right? Ham, Shem, and JPF. Right now, they were in the culture of depravity on the likes that we are walking into. But for them it wasn't laboratory. It was actual hybridization right in front of them.

[\(11:31\)](#):

Like, that's hard for me to kind of conceive because it's like some sort of science fiction movie, these humans it's like Lord of the rings. You know, like there was five, there was five races on the earth and little flipping smuggles running around. You know what I mean? But literally think about it. It's literally telling us there's humans, there's angels and there's giants. So you've three races on the earth. Think about that, which is okay. So they're in that culture and they're surrounded by this crazy oppressive, like evil. So they get on the Ark. Everyone dies and drowns and they end up like docking on the side of a mountain. And they sit there for like several weeks while the water goes away. And a couple of months later, it dries up and they we're going to find ourselves right here. Genesis nine. Now, verse 18.

[\(12:23\)](#):

Now the sons of Noah who went out of the Ark were Shem, ham, and Japheth. Him was the father of Canaan pay attention to that. Ham was the father of Canaan. I want to show you something right now. These were the three sons of Noah from these. The whole earth was populated. Pay attention to that. There's people that'll tell you that the moon passed on a certain angle. And it was a solar, not a solid, it was like a lunar eclipse where it pulled all the water from one side of the earth to the other. And it just flooded the region. It's literally telling us the whole earth died. Okay. I'm going to believe the word of God. Okay. The firmament collapsed. It didn't just partially collapsed. It. Wasn't just like, you know, on, you know, one leaning on one side the whole earth died. Okay. How do you think the grand canyon was formed?

[\(13:20\)](#):

Have you ever been at the beach? And like, there's just like water keeps flowing and you just, it just starts digging out a channel. Huh? I wonder. Think about that for a second. The amount of water I've just described to you was flowing the way I just told you, maybe it carved out an entire canyon or several of them. Think about that. Just, just throwing out some ideas. Oh, it's millions of years old. Not according to the Bible. It's probably about six to 10,000 years old. Okay. I don't listen to science. I don't follow the science. I follow the king. It's just pretty much. That's where I'm at. Okay. So I need to keep moving here. I got a lot to cover. Now what I'm about to tell you is a little graphic. So just put your belts on and don't get offended. Okay.

[\(14:11\)](#):

I fought the part about the angels and the ladies making babies was bad. Yeah. Well, it's about to get weird. It's about to get really weird. The, so these are the whole, these are populated the whole earth and Noah began to be a farmer and he planted a vineyard. So that probably took a little while because you don't just plant it in the next day. You've got a vineyard. It's going to take a minute for it to grow. Then he drank the wine and he was drunk and he became uncovered in his tent and him, the father of Canaan. So the nakedness of his father and told his two outside, but Shem and Japheth took a garment and laid it on both of their shoulders and Winton backwards and covered the nakedness of their father and their faces were turned away. Now just come with me for a second.

[\(15:07\)](#):

Just, just pause from reading further. I want to tell you something here, because a lot of this was written in a time period where certain things weren't even considered or talked about. Okay. But if you go back to the original, you're going to start seeing that there's something here. Those sons were raised in the most perverted idea of culture, three races walking around sexual perversion on levels that we can't even imagine. Okay. So when it says that hem saw that his father was naked, it's not just suggesting that he just saw him. And I'm going to show that to you in just a second, because the perversion and ham was crazy. Watch this. And so the other brothers went back into the tent and they covered the nakedness of the fathers. Their faces were turned away and they did not see their father's nakedness. So Noah awoke from his wine. Now watch this and knew what his youngest son had done to him. You reading this.
